REGULATIONS.

1. All meters or others who measure and weigh goods delivered out of or put on board any vessel shall, within six hours after the vessel is discharged or loaded as the case may be, render an account thereof at the collector's office.
2. On the arrival of any vessel, the master shall forthwith report his arrival at the collector's office, and give an account of his cargo by producing the manifest, bills of lading, manifest book, cargo book, freight account book, invoices of goods, Custom House papers and such other documents as the collector considers necessary for ascertaining the true contents thereof. The master, or the owners or agents or managers of the owners, shall within two hours of the first opening of the collector's office after the arrival of the vessel, pay to the collector the rates payable, or give security for such payment by the deposit with the collector of such amount as the collector considers sufficient, and the owners or consignees of the cargo shall, within the time aforesaid and before breaking bulk, pay to the collector the rates payable in respect thereof, or give security for such payment by depositing with the collector such amount as the collector considers sufficient, and no goods shall be discharged without a permit or warrant obtained from the collector.
3. The master of every vessel taking goods on board shall give notice at the collector's office and procure a warrant to ship the goods before he begins to load, and shall immediately on their being shipped and before sailing give an account of the

cargo shipped by producing at the collector's office the documents aforesaid, and the master or the owners or consignees of such goods shall, before the vessel sails, pay the rates due on such goods.

4. No vessel shall leave the Haven until the provisions applicable to such vessel and her cargoes inwards and outwards are complied with. 5.

5. The owner manager or person in charge of all goods otherwise imported or exported shall give an account thereof at the collector's office and produce therewith all documents necessary to vouch such account and shall pay at the said office the rates payable in respect of such goods immediately on their arrival, and before their removal from the quays, sheds or landing places in the case of imports, and before they leave the Haven in the case of exports. 10 15

6. Section forty-four of the Harbours Docks and Piers Clauses Act, 1847, shall apply to any refusal neglect or failure to pay or grant securities for the rates payable in respect of vessels by any person required to do so by these regulations, and the other provisions of the said Act with respect to the collection and recovery of rates shall have effect subject to these regulations. 20

7. The master of every vessel shall produce to the harbour master, at least one hour before leaving the Haven, a permit obtained at the collector's office after payment of all rates for which the vessel is liable, and notwithstanding anything contained in the provisions of the said Act with respect to the payment collection and recovery of rates, or in this Schedule, the Commissioners may agree with the owner or agent of any vessel as to the mode in which and the time at which the rates payable in respect of such vessel shall be paid and the Commissioners may require such guarantees or other security for payment of the rates as they may think fit. 25 30

8. The rates on all vessels arriving light or in ballast shall be paid immediately on arrival, and on all others on their arrival or as soon as the cargo is discharged. 35

9. When a cargo imported belongs to more than six persons, the collector may demand from the master agent or other person who collects the freight a deposit for the whole cargo before breaking bulk.

10. In charging the rates authorised by Part II. of this Schedule, the gross weight or measurement of the articles shall be taken and in all cases of weight or measurement not proved by evidence satisfactory to the collector, the owner shall at his own expense have the goods weighed or measured to the satisfaction of the collector before the goods are removed from the quays. 40 45

11. In these regulations the expression "the collector" means any person appointed by the Commissioners to collect the rates payable under this Schedule.

THIRD SCHEDULE.

A.D. 1925.

PROVISIONS AS TO SINKING FUND.

(1) If the Commissioners resolve to repay borrowed money by means of a sinking fund, the sinking fund shall be formed
5 either—

(a) by payment to the fund throughout the period fixed for repayment, of such equal annual sums as will together amount to the sum for the repayment of which the fund is formed, and a sinking fund so formed is in this
10 Act called a non-accumulating sinking fund; or

(b) by payment to the fund throughout the period fixed for repayment, of such equal annual sums as with accumulations at a rate not exceeding four pounds per centum per annum will be sufficient to pay off within
15 the said period the sum for the repayment of which the fund is formed, and a sinking fund so formed is in this Act called an accumulating sinking fund.

(2) Every sum paid to a sinking fund, and in the case of an accumulating sinking fund the interest on the investments of
20 the fund, shall, unless applied in repayment of the loan in respect of which the sinking fund is formed, be immediately invested in trustee securities.

(3) In the case of a non-accumulating sinking fund the interest on the investments of the fund may be applied by the
25 Commissioners towards the equal annual payments to the fund or carried to their general account.

(4) The Commissioners may at any time apply the whole or any part of a sinking fund towards the discharge of the money for the repayment of which the fund is formed :

30 Provided that, in the case of an accumulating sinking fund, the Commissioners shall pay into the fund each year and accumulate during the residue of the period fixed for repayment, a sum equal to the interest which would have been produced by the fund so applied if invested at the rate per centum per
35 annum on which the annual payments to the fund are based.

(5) If at any time the income of an accumulating sinking fund is not equal to the income which would be derived from the amount invested if it were invested at the rate per centum per annum on which the equal annual payments to
40 the fund are based, any deficiency shall be made good by the Commissioners.

(6) If at any time the income of an accumulating sinking fund is in excess of the income which would be derived from the amount invested if it were invested at the rate per centum

per annum on which the equal annual payments to the fund are based, any excess may be applied towards such equal annual payments or carried to the Commissioners' general account.

(6) Any expenses connected with the formation, maintenance, investment, application, management or otherwise of any sinking fund under this Act shall be paid by the Commissioners. 5

(7) If it appears to the Commissioners at any time that the amount in the sinking fund, with the future payments thereto in accordance with the provisions of this Act (together with in the case of an accumulating sinking fund the probable accumulations thereon) will not be sufficient to repay, within the period fixed for repayment, the money for the repayment of which the fund was formed, it shall be the duty of the Commissioners to make such increased payments to the fund as will cause the fund to be sufficient for that purpose : 10 15

Provided that if it appears to the Minister that any such increase is necessary, the Commissioners shall increase the payments to such an extent as the Minister may direct.

(8) If the Commissioners desire to accelerate the repayment of any loan they may increase the amounts payable to a sinking fund. 20

(9) If the amount in a sinking fund with the future payments thereto (together with in the case of an accumulating sinking fund the probable accumulations thereon) will in the opinion of the Minister be more than sufficient to repay within the period fixed for repayment the money for the repayment of which the fund was formed, the Commissioners may reduce the payments to be made to the fund, either temporarily or permanently, to such an extent as the Minister may approve. 25

(10) If the amount in any sinking fund at any time (together with in the case of an accumulating sinking fund the probable accumulations thereon) will in the opinion of the Minister be sufficient, without any further payments thereto, to repay the loan in respect of which it is formed within the period fixed for payment, the Commissioners may, with the consent of the Minister, discontinue the equal annual payments to the fund until the Minister otherwise directs. 30 35

(11) The surplus of a sinking fund remaining after the discharge of the whole of the money for the repayment of which it was formed shall be applied to such purpose as the Commissioners with the consent of the Minister may determine. 40

(12) It shall not be obligatory upon the Commissioners to commence to make any payments to a sinking fund until the expiration of five years from the passing of this Act.

(13) The clerk shall, within forty-two days after the expiration of each year during which any sum is required to be 45

set apart for a sinking fund under this Act, transmit to the Minister a return in such form as the Minister may prescribe, and verified by statutory declaration if so required by the Minister, showing the amount which has been invested for the purpose
5 of the fund or paid off by instalments during the preceding year, and the description of the securities in which it has been invested, and showing the purposes to which any portion of the money invested for the fund or any interest thereon has been applied during the year, and the total amount remaining invested at the
10 end of the year, and in the event of any wilful default in making such return the clerk shall be liable to a penalty not exceeding twenty pounds recoverable summarily on the prosecution of the Minister but not otherwise.

(14) If it appear to the Minister that the Commissioners
15 have failed to pay any instalment, or to set apart the sum required by this Act for the fund, or have applied any portion of the money set apart for the fund or any interest thereon to any purposes other than those authorised by this Act, the Minister may by Order direct that a sum not exceeding double the amount
20 in respect of which such default has been made shall be set apart and invested as part of the fund.

(15) Where the Commissioners are authorised by any statutory borrowing power to raise money for any purpose, they may, instead of exercising that power by the issue of any fresh
25 security in respect thereof, exercise the power and raise the money by using for such purpose so much of any money for the time being forming part of a sinking fund as shall be available for the repayment of a loan which is secured by a charge on the same security as would be specifically chargeable as the security
30 for the repayment of a loan under the statutory borrowing power if the same were raised by the issue of a fresh security and which is not shown by the deed to be raised in exercise of a particular borrowing power specified therein.

(16) If the Commissioners exercise the powers conferred on
35 them by the last preceding paragraph, they shall—

- (a) withdraw from the sinking fund a sum equal to the amount of the statutory borrowing power proposed to be exercised by the user of money from such sinking fund; and
40 (b) credit the sinking fund with the repayment of an amount of the principal money for the repayment of which the fund is established, equal to the sum withdrawn from the fund, and thereupon the amount so credited shall be deemed to be principal money discharged by application
45 of the sinking fund;
- (c) debit the account of the statutory borrowing power proposed to be exercised, with an amount of the principal money equal to the sum withdrawn from the sinking

fund, and thereupon the statutory borrowing power shall be deemed to have been exercised as fully as if the said amount had been raised by the issue of a fresh security and the provisions of any enactment as to the repayment and re-borrowing of such sums raised under the statutory borrowing power shall apply thereto accordingly. 5

(17) The Commissioners shall furnish to the Minister all such information with regard to the exercise of the powers contained in the two last preceding paragraphs as the Minister may require. 10

(18) In this Schedule "statutory borrowing power" means any power, whether or not coupled with a duty of borrowing or continuing on loan or re-borrowing money or of redeeming or paying off or creating or continuing payment of or in respect of any annuity, rentcharge, rent or other security, representing or granted in lieu of consideration for the time being existing under any Act of Parliament, or Order having the force of an Act, or under any order or sanction of any Government Department made or given under the authority of an Act. 15
